

FLEXCO ESSENTIALS + BCP SCHOOL

Do you have a team that can benefit from learning the essentials of heavy duty conveyors as well as hands-on experience installing Flexco Belt Conveyor Products? If so, this combo school experience is just the solution!

This unique school experience begins with Flexco Essentials, a one day school covering the essentials of heavy duty conveyor systems. The school welcomes newcomers as well as those seeking to fill gaps in their heavy duty knowledge. Taught by Flexco's most experienced heavy duty experts, the school covers heavy duty conveyor system components and illustrates the function of each and also how they contribute to productivity, efficiency and safety on the job site.

Following Flexco Essentials is the opportunity to gain real world insights and hands-on experience installing Flexco Belt Conveyor Products (BCP) in our engaging, hands-on 2 1/2 day BCP School.

- **AT THE 3½ DAY TRAINING, YOU WILL:**
- Learn how each component of the conveyor contributes to conveyor productivity, efficiency, and safety
 - Leave with one year access to Flexco Essentials eLearning
 - Dive into challenging real life applications to find the optimal product solution
 - Get hands-on experience with Flexco products using installation rigs specifically designed to mimic real world conditions
 - Optimize the safety and efficiency of your operation by performing key maintenance and service activities
 - Experience a stimulating learning environment, led by facilitators eager to learn more about your particular challenges and successes
 - Bring your own on-site photos, videos, and stories to be analyzed by an experienced team of Flexco experts and discussed during training

Check out our training agenda below and sign up today!
